Subject: Microsoft settlement

We do not understand why the government hasn't put a stop to this suit.
There has been thousands of dollars spent on litigation by both parties.
The government is spending our tax money to sue one of the most successful companies in our nation, who has contributed so much to the economy here.
The suit is based on other technology companies who are unhappy with the success of Microsoft..
We are involved in a manufacturing business and we do not divulge how our product is manufactured, allowing other companies to make the same thing.
Please allow Microsoft to be the inovative company they have always been.
Thank you.
